Handling and Racking Equipment for Windows and Doors

DOLLY MAN-10

The Dolly MAN-10 is meant for handling heavy objects such as windows and doors. It is designed to significantly reduce physical efforts resulting in a safer, cheaper and more efficient handling. Move objects up to 800 pounds effortlessly!

DOLLY MAN-11

Truly revolutionnary! The crank system makes handling large objects much easier. Only ONE person is required for transporting large and bulky loads instead of two or three workers. The operator can perform operations without having to handle the load itself with their hands. Lift up to 1000 pounds.

ELEVATOR MAN-07

lifts loads from the ground to higher surfaces such as a truck box or an upper stage using a drill and winch. Lift up to 500 pounds.

WHEEL BOARD MAN-14

The Manutech skateboard is used to handle doors and windows as well as materials and furniture. Lift up to 500 pounds.

Racking, Shipping

MAN-031

Manutech's storage system is modular and versatile. A durable and personalized solution that can be easily adapted to all hardware stores surfaces. No friction is incurred during the rolling process and no maintenance is required. The storage supports can be linked with many different configuration options according to client requirements (front, back and side configurations). Many different options are available.

The modular storage system is the perfect solution when combined with the various handling equipment available.

Manutech can also design and produce custom accessories no matter your requirements for the perfect fit.

MAN-01

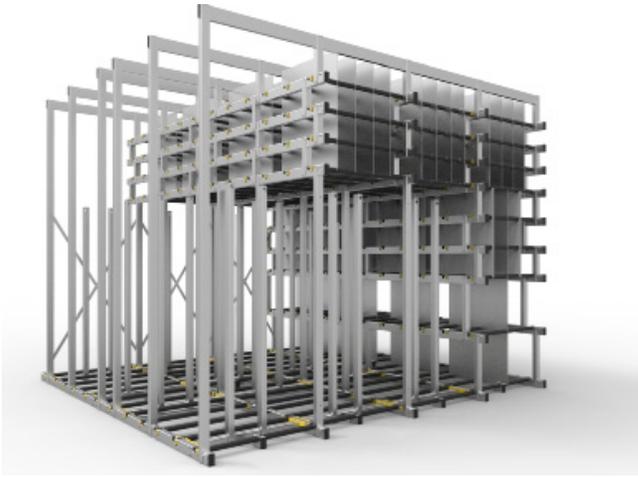

Carry your windows and doors wherever you need with our transport rack for forklifts with wheels. Also available in 8' and 10'.

DOLLY MAN-15

Innovative motorized door and window handling system for semi-trailer trucks. Allows the truck driver to handle the loads BY HIMSELF! Lift up to 1000 pounds.

Custom Equipement
